CAPABILITY STATEMENT

WEL Enterprise (**W**ater, **E**nergy, **L**and) specializes in the engineering and building of systems for water purification, wastewater treatment and natural resource management.

As a pioneer of innovation and leader in water purification and wastewater management, WEL has developed and implemented the first closed loop industrial wastewater reclamation system.

WEL's mission is to prevent environmental degradation, improve industrial operations and preserve humanity.

CORE COMPETENCIES

Water Purification and Wastewater Treatment

- Water Reclamation Systems and Solutions
- Single platform for both water purification and wastewater treatment
- Purifies water, solids and other elements
- Produces water which exceeds all federal quality standards for drinking water
- Allows for reuse of treated wastewater liquids
- Eliminates all known contaminants & pollution

WEL Water Relief Unit

- Mobile unit specifically designed for disasters
- Immediately supplies a source of clean water
- Produces drinkable (potable) water in minutes
- Can supply 200+ people with safe water daily
- Produces up to 1,080 gallons per day
- Can handle municipal and toxic waste streams
- Unit size: 6' height, 3' width, 3' length
- Unit weight: 250 pounds
- Energy requirements: 110V, 15 amps
- Accommodates alternative power sources

COMPANY SNAPSHOT

WEL Enterprise
1020 Winding Way
Covington, KY 41011

DUNS: **080082202**
NAICS: **237110**
334512
334513
541330
562211

DIFFERENTIATORS

- First Closed Loop Industrial Wastewater Reclamation System
- Patented process for wastewater reclamation
- Detailed multi-phase analysis process
- Continuously monitored system with state-of-the-art sensors and safety shutoff valve
- Unique Software Simulation showing current processes, future processes and projected ROI
- Cross functional team of industry and technology experts
- Partner with leading companies for construction and assembly
- 100% of all systems fabricated in United States

PAST PERFORMANCE

- WEL Water Relief Unit built and tested to handle worst streams of municipal waste including Bacteria, Industrial Chemicals and Sewage
- Partner with both Federal and Ohio EPA
- Developed wide range of systems including multi-phase systems with zero discharge
